About me

Recent postgraduate with comprehensive knowledge in computer networking, cloud computing, and virtualization technologies. Proficient in CI/CD methodologies, Git, Terraform, Docker, Kubernetes, Python, Bash scripting, Grafana, AWS, and Azure. Eager to apply these skills to innovative cybersecurity projects, with a solid foundation in Agile/Scrum methodologies.

Technical Skills

- Languages: C/C++, Python, SQL, Shell Scripting (Linux)
- Cloud Platforms: AWS, Azure
- Tools: Jenkins, Docker, Kubernetes, GitHub, SonarQube, Jira
- Other: CI/CD, Git, IaaC (Terraform), Bash scripting, Grafana monitoring, Security, Agile/Scrum

Certifications

o Microsoft Azure Fundamentals (AZ-900) - Link

Education

• MCA / Vellore Institution of Technology, Chennai September 2022 – July2024

GPA :- 7.94

• BSC-IT / NM College, Mumbai

July 2019 - April 2022, Mumbai University

CGPA :- 8.45

 Higher Secondary School / Sydenham College, Mumbai Aug 2017-April 2019, Maharashtra Board

Percentage:-81%

• Secondary School / RBK School, Mumbai April 2015-April 2017, ICSE Board

Percentage :- 89.8%

Projects

- Dassets Kotlin App
 - o Description: Developed an app for tracking Indian stock market and cryptocurrency prices, using API. Integrated Firebase for backend and implemented OTP authentication.
 - o Relevance: Demonstrates app development skills and backend management, applicable in secure financial technology environments.
- Deployed Website AWS, Jenkins (<u>Link</u>)
 - Description: Deployed a website on a Docker container using AWS, implemented a CI/CD pipeline with Jenkins for seamless updates.
 - o Relevance: Highlights skills in deploying secure applications and utilizing CI/CD tools, important for maintaining secure and robust cybersecurity infrastructures.
- Web Scraping Script Python
 - Description: Created a Python script using Beautiful Soup to extract stock information from Yahoo Finance.
 - Relevance: Showcases ability to extract and handle data securely, a key component in cybersecurity for data protection and threat intelligence.

Experience

DevOps Intern, Solytics Partners

August 2023 - May 2024

- Executing end-to-end CI/CD pipelines using Jenkins, optimizing build processes through Groovy scripting.
- Containerizing applications with Docker for efficient deployment and scalability.
- Conducting code quality analysis using SonarQube to enhance software reliability.
- Orchestrating containerized applications on Kubernetes for seamless deployment and scalability.
- Collaborating on GitHub for version control and maintaining a streamlined development workflow.
- Utilizing AWS and Azure for infrastructure management, contributing to efficient deployment processes.
- Technologies Used: AWS, Docker, Jenkins, Groovy Scripts, Kubernetes, GitHub, Azure

Extra Circular Activities

- Participated in SET Conference and produce a research paper on Automatic Number Plate Detection.
- Participated in MUNs and was a part of the MUN PR team in my UG College.
- Designed a workshop based on Adobe Photoshop in my UG College.
